

Marepox MR 68 Primer

Epoxy resin-based, two-component, anti-corrosive primer/intermediate coat containing zinc phosphate, suitable for thick film application, cured with polyamide. It stands out for long-term protection of steel surfaces due to its easy sanding and high anti-corrosive properties. It can be used in environments where atmospheric corrosion category is higher than C4 .

Type: Polyamide Cured Epoxy Primer

Usage: General Industry

Physical Information:

Glossy	Satin
Colour:	Grey, Red
Volume solids:	68%
VOC (theoretical):	320 g/l
Density:	At 20 °C ± 1,45kg/l
Theoretical coverage:	At a dry film thickness of 100 µm: 6,8 m²/l
Heat resistance:	120 °C
Shelf life:	In original well shut packaging 12 months, stored inside at temperatures between 5 °C and 40 °C.
Potlife:	2 Hours
Thinner:	MIT
Mixture:	Marepox MR 68 A 5 : 1 Component B

Processing Data

	Airless spray	Brush-roller	Airspray
Thinner	-	-	-
Amount	5 vol.%	10 vol.%	10-20 vol.%
Nozzle	min. 0.021 inch	n.a	1.2-1.7 mm
Flow pressure	160 bar	n.a	3-5 bar
Dry film thickness	50 µm	50 µm	50 µm

Cleaning tools: Immediately after application using thinner T-10.

Mixing instructions: preferably using a mechanical mixing device. The temperature of the mixed product should at least be 10 °C during application.

Drying Times

	10 °C	20 °C
Dust free	1 hour	30 min
Manageable	3 hours	2 hours
Recoatable	8 hours	6 hours

Marepox MR 68 Primer

Surface Preparation

Steel roughness

profile 10 – 25 µm

Untreated steel

The surface needs to be pretreated according ISO12944 part 4 § 6.2.3. Remove grease, oil, dirt etc. Grit blasting to purity degree Sa 2½ in accordance with ISO 8501-1. After blasting remove all dust from the entire surface with compressed air which is free of moisture and grease. Apply first coating layer within 6 hours. In case the final coating layer is applied on the construction site, extra precautions need to be taken.

Application conditions

Application temperature should be in the range of 5°C to 40°C to get the perfect result. Keep application area well ventilated during application and drying, in order to reduce evaporated solvents. This is necessary to acquire good drying conditions and for the good of the applicators' health.

Environment and health

Harmful and irritating in contact with skin, eyes and by inhalation. In case of eye contact, immediately wash with large amounts of water and contact a medical expert. Do not eat, drink or smoke during application.

Maintenance

It is recommended to clean the surface regularly and to inspect the coats of paint for defects annually. Touch up any defects with the original paint system.

Packaging

30 kg cans.
